

### Horn Speaker (NT-15 HS)

The NT-15 is a professional 500W high-powered speaker designed for large outdoor venues like stadiums and concert fields. It delivers exceptional 132dB max sound pressure with a 500m projection range, ensuring clear audio coverage even in expansive areas. Featuring a 15" driver plus tweeter/horn and a durable fiberglass enclosure (585×805×585mm, 46.5kg), it offers full-range sound (60Hz–18KHz) with precise 20°×40° dispersion. With 108±3dB sensitivity and 100V/8Ω impedance, this speaker is built for reliability in demanding environments like sports arenas, festivals, and public address systems.

### TECHNICAL DATA SPECIFICATION

Model	NT-15 HS
Rated Power:	500W
Line voltage:	100V/8Ω
Sensitivity:	108± 3dB (1m 1W)
Frequency Response:	60-18KHz
The maximum sound pressure:	132dB
Flightshot:	500M
Point:	20x40
Drive:	15" +alt
Physical Dimention (mm):	585Wx805Dx585H
The material of the box:	Glass steel
Weight (kg):	46.5

KEY FEATURES

The NT-15 is a professional 500W speaker delivering 132dB sound up to 500m. Features a 15" driver + horn, 60Hz-18KHz range, and rugged fiberglass body (585×805×585mm, 46.5kg). Ideal for stadiums, concerts, and large outdoor events with 100V/8Ω compatibility. Built for powerful, long-range sound.

QUICK GUIDE

The NT-15 is a professional 500W long-range speaker delivering 132dB peak SPL with 500m projection, featuring a 15" woofer + horn, 60Hz–18KHz frequency response, and rugged fiberglass enclosure (585×805×585mm, 46.5kg).
