

# NT – 167 PS

## Professional Speaker System

NT-167PS

- **System: 2-way full range & Power: 700W**
- **Frequency Response: 40Hz-18KHz**
- **Driver: LF:15"X2HF:1.5"X1**
- **Impedance & Sensitivity: 4 ohm & 98 dB**
- **Maximum: 125 dB**
- **Size (mm): 560x500x1065**
- **Package size (mm): 630x590x1180**
- **Net & Grass weight: 55.5 & 60 KG**

Professional speaker systems are designed to deliver high-quality sound with exceptional clarity and power, ensuring clear audio across large spaces and

### Primary aspects

Two-way, dual-driver full-range design with high sound pressure and sensitivity A wide directive angle of 90 \*55 degrees that gives the loudspeaker the sound reinforcement ability to get wider coverage, Excellent frequency response, and phase in simulation design of computer optimization

### Design Illustration

This series is a kind of subwoofer sound System compatible with a power amplifier that ranges from 350W to 1000W is recommended with bass elasticity, strong & pure LF, and powerful high-sound pressure output. Computer optimizing and simulation design to get good frequency response and phase characteristics.

### This professional speaker

with a convenient installation process that stands out for its exceptional versatility and sound clarity, catering to a wide range of audio needs. Its robust construction ensures reliable performance across various settings, making it an ideal choice for both professional and casual users. Consistently delivering superior sound quality and functionality, this speaker is a dependable solution. Its user-friendly features and durable build further enhance its appeal, offering precise volume control and the ability to manage multiple inputs simultaneously, it can be used in bar, disco, and large audio projects; it can be used as a sound reinforcement speaker for full-range audio systems. it can be used as a sound reinforcement speaker, monitor speaker, and fill-in speaker for mobile show systems This professional speaker offers easy installation and exceptional sound clarity, making it suitable for various audio needs. Its sturdy construction ensures reliable performance in diverse settings, ideal for both professional and casual users. With user-friendly features and a durable build, it provides precise volume control and can handle multiple inputs simultaneously. It can be used as a full-range sound reinforcement speaker, monitor speaker, or fill-in speaker for mobile show systems.
