

NT - 3120 OCS

Outdoor Column Speaker

- Material: Aluminum
- Frequency Response: 80Hz-18KHz
- Drive: L:5" / H: Horn Tweeters
- Line Voltage: 70V-100V
- Sensitivity: 92 dB
- Power: 120 W
- Dimension (mm): 107x105x730
- Net weight: 8 KG

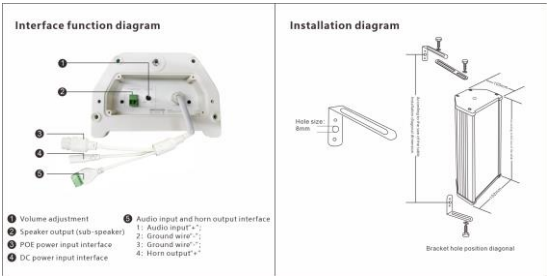

Outdoor column speakers provide powerful, clear audio in open environments with a weather-resistant design, ideal for parks, stadiums, and public spaces.

Primary aspects

Outdoor column speakers are built with a weather-resistant design to withstand various environmental conditions. They are engineered to deliver powerful sound output, effectively covering large open spaces and providing high-quality audio even in challenging outdoor settings.

Outdoor column speakers

are designed to deliver high-quality audio in outdoor settings, providing clear and consistent sound coverage across large areas. Built with weather-resistant materials, these speakers can withstand harsh conditions, featuring rust-proof grilles and waterproof drivers. Their vertical array of drivers ensures sound projects over long distances while maintaining clarity. Many models also incorporate anti-corrosion coatings and UV-resistant housings to prevent damage from prolonged sun exposure, ensuring longevity in challenging environments. Ideal for public address systems, outdoor events, and commercial spaces, outdoor column speakers offer robust performance and easy installation with versatile mounting options. Additionally, they often include integrated crossover networks to optimize frequency distribution, enhancing the overall audio experience. Their durable design and advanced audio capabilities make them a reliable choice for enhancing sound in any outdoor environment.
